Innovation Events to support innovation spirit

A New Centre - under development -

The Knowledge Management Centre:

- Established on 1st October 2009
- Founding: ~2 M Euros from the New Hungary Development Plan (EU + national sources)
- Main objective: to collect, analyse, share and exploit knowledge produced at the university
 - > Development of datawarehouses („knowledge map”: who knows what?, etc.)
 - > Information services, systems support R&D activities
 - > Knowledge dissemination activities: scientific events, analyses and publications

„Third mission” activities

- Business development office – to be opened on 10 February 2010 – launch event of the project
 - To support R&D project development
 - To support technology transfer and spin-off creation
- Széchenyi Duo Grant – competition based support for student-teacher tandems to develop prototypes
- New graduate/post graduate programme: „entrepreneurial project development”
- Networking, partnerships and collaboration
- And many more...

Welcome you as
collaboration partner!

Thank you for your attention!
